- Worked on full-stack projects as a MERN stack developer.
- Controlled forms and event loop specialization carried out.
- Completed the projects given on or before time with outstanding results.
- Successfully completed the examination and certified full-stack developer.

RECENT PROJECTS

Current Projects (On-Going)

1-> Mobility transportation

Admin Dashboard to control the vehicles

The project consists of an admin dashboard where the real-time data is fetched through an IoT device installed in the vehicle and a connection made through a SIM card by a VPN. IoT device controls the movements and functions of vehicles in real-time and gathers data to the admin dashboard. Geo-locations have been implemented for fare changes and set boundaries.

2-> Drug Mart - MERN Stack

A Drug-Mart store to handle the customer needs and required types of equipment and medicine. Customers can order online as an e-commerce website and products will be delivered to their doorsteps.

Houzez24 Real Estate (On Job)

WordPress, PHP, Elementor, MySQL

A Real Estate website for agents and customers for renting and selling their properties directly or through the help of agents. Customized search results and grid maps were included for better results and forms were added for inquiries for customers and agents as well.

Deployed Link: <https://qhomely.net/>

Roxoacai (On Job)

React.js, Email-Js, Material-UI, Carousel

Food order and table booking application to the Acai shop for popularizing and showcasing the shop items to customers and accepting orders and queries handling for the customer.

Deployed Link: <https://roxoacai.qa/>

Student Task Submission Portal

Material-UI, Express, HTML, JavaScript, React.js, Node-mailer, Node.js, jwt, mongoDB, axios

A full-stack application that allows registered mentors to add and remove the particular task to students and also can evaluate the submitted task by students. Students are allowed to check the task given by mentors and can submit the solved task on the portal. Admins are allowed to add and remove the mentors as well as the students and can hold control over the portal.

Deployed Link: <https://student-task-submission.herokuapp.com/>

Drive Well

React.js, Node.js, Material-UI, jwt, MongoDB, Express, Node-mailer, mongoose, jwt, Axios

A full-stack application that allows the registered users to lend their cars or buy a car for rent in an efficient manner at reasonable prices. Notifies the car nearby on rent or to lend someone and can have attractive deals.

Deployed Link: <https://drive-well.netlify.app/>
